R-PCN18-40

CORDLESS NAILER FOR CONCRETE AND STEEL
18 V Li-Ion

The new R-PCN18-40 battery-powered nailer for concrete and steel ensures increased efficiency in installation, electrical work and the assembly of drywall systems.

FEATURES AND BENEFITS

- Tool energy increased to 100 J to enable driving nails up to 40mm long into the hardest materials.
- Lithium-ion battery provides twice the performance – 900 fasteners per charge and a 50-minute charge time.
- Ergonomically designed grip position for better balance and comfort
- Sequential operation ensures safe operation.
- Designed for increased durability and increased airflow efficiency through the air filter zone.
- Comfortable, reliable, and accurate fastening with keyless nail depth adjustment for greater precision and ease of use.

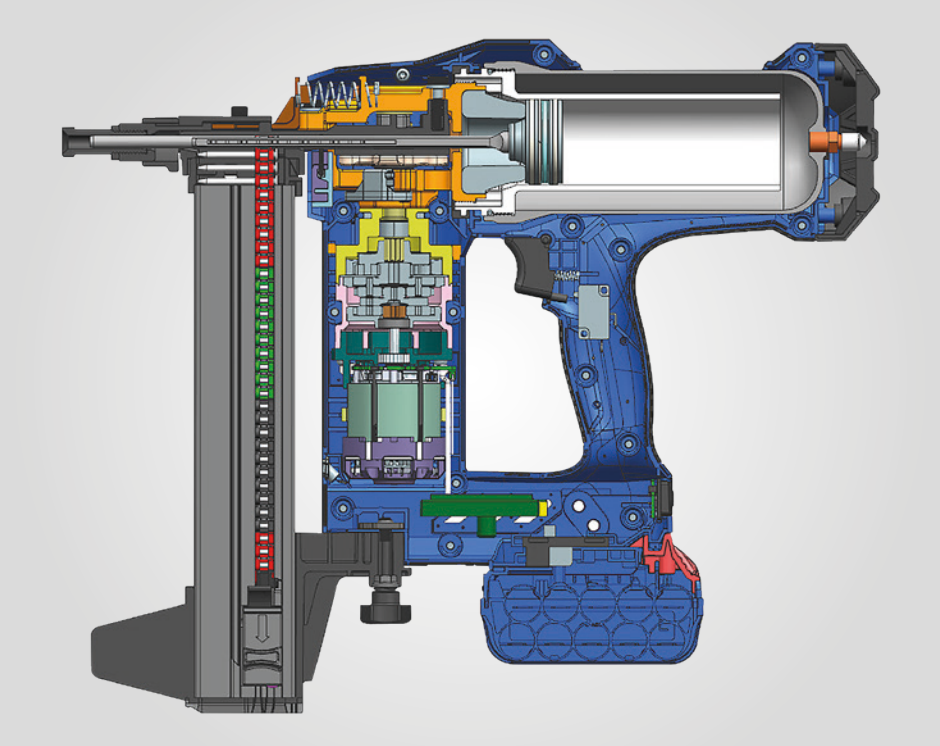
BASE MATERIALS

- Concrete
- Cracked concrete
- Reainforced concrete
- Steel

R-PCN18-40

CORDLESS NAILER FOR CONCRETE AND STEEL
18 V LI-ION

The R-PCN18-40 battery nailer for concrete and steel is an excellent cordless alternative for installation applications – no power cables, gas canisters, or compressed air hoses required. It increases the efficiency of installation, electrical, and drywall work. Each fastening is completed in under 1 second. Combined with a battery capacity of 900 fastenings and a battery charge time of only 50 minutes, the results are significant gains in work efficiency and installation repeatability.



APPLICATIONS

- Installation of cable trays and channels
- Installation of drywall systems
- Installation of cable holders and conduits
