RT-GS-S Glue sticks for sanitary use

Glue sticks for bonding sanitary materials and products, e.g. appliances, tiles and plastic materials and cables

Product information

Features and benefits

- The white color of adhesive is ideally suited for use in a sanitary environment
- The diameter of 12mm allows the adhesive to be used in most adhesive guns available on the market
- Short curing time, 25-30 seconds, allows for quick work
- Does not emit odor while working
- The length of 200 mm allows for a longer operating time on one glue stick
- Resistance to temperature of 0°C enables operation at low temperatures
- Operating temperature of 170-210°C

Applications

- For bonding sanitary materials and products, e.g. appliances, tiles and plastic materials and cables

Base materials

- Sanitary ceramics
- Ceramics
- PVC Profile
