RT-GS-W Glue sticks for bonding wood

Glue sticks for bonding surfaces of wood, wood-based materials and leather

Product information

Features and benefits

- The diameter of 12mm allows the adhesive to be used in most adhesive guns available on the market
- Short curing time, 30-35 seconds, allows for quick work
- The length of 200 mm allows for a longer operating time on one glue stick
- Honey color of adhesive allows applying in many areas
- Does not emit odor while working
- Resistance to temperature of -5°C enables operation at low temperatures
- Operating temperature of 170-210°C

Applications

- For bonding surfaces of wood, wood-based materials and leather

Base materials

- Wood
- Plywood
- Chipboard
- Oriented Strand Board
